EDUCATION

Rajeev Gandhi Memorial College of Engineering and Technology

September 2023 – 2027

Bachelors of Technology(Data Science) - **CGPA - 8.2**

Kurnool, India

PROJECTS

Remediation Agent 🔗 | LLMs, RAG, LangChain, NLP, Transformers, Vector DBs

January 2026

- Developed an AI-driven SDLC automation platform that unified code analysis, auto-remediation, testing, and feedback loops to enhance software reliability and release velocity..
- Engineered a multi-agent GenAI system that streamlined code assessment, issue resolution, test automation, and production insights for faster and higher-quality deployments..
- Implemented an intelligent software lifecycle framework using AI agents to detect defects, generate fixes, automate testing, and continuously optimize engineering workflows..

Ingest IQ 🔗 | NLP, Semantic Mapping, RAG Pipelines, Confidence-Scoring AI

January 2026

- Designed an intelligent ingestion platform powered by generative AI that interprets heterogeneous data sources, aligns schemas automatically, and produces standardized datasets..
- Architected an AI-driven data pipeline that replaces rigid ETL logic with semantic understanding, enabling adaptive transformation of unstructured and semi-structured inputs..
- Created a production-grade LLM ingestion system capable of detecting schema variations, resolving naming inconsistencies, and generating clean datasets with traceable lineage..

EXPERIENCE

Angoor AI 🔗

Mar 2026 – Aug 2026

AI Engineering Intern

Bengaluru, India

- Built and deployed scalable AI/ML and LLM-powered applications for automation, analytics, and intelligent decision-making.
- Experienced in Python, LangChain, RAG, vector databases, cloud platforms, and MLOps, delivering production-ready AI solutions.

Google Summer of Code 2026 🔗

Apr 2026 – Present

Open Source Contributor

India

- Building an end-to-end NLP engine to process large-scale qualitative usability data, including user feedback, transcripts, moderator notes, and task observations. -designing automated text normalization and preprocessing pipelines for cleaning and structuring raw, unstructured data.
- Implementing semantic analysis models using modern NLP techniques (spaCy, transformers) to extract meaningful insights from user feedback.

Relevance Lab 🔗

Dec 2025 – Present

Artificial Intelligence Intern

Bengaluru, India

- Assisted in building and optimizing AI solutions using Python and ML frameworks, performing data preprocessing, model training, and performance evaluation.
- Designed and deployed AI models by analyzing large datasets, improving model accuracy through feature engineering and algorithm optimization.

TECHNICAL SKILLS

Languages: Python, Java, C, Dart, JavaScript, SQL, NoSQL

Developer Tools: VS Code, Android Studio, IntelliJ Idea Ultimate

Technologies/Frameworks: Linux, Git, NodeJS, Git, LangChain, LangGraph, Hugging Face Transformers, AWS, n8n, LlamaIndex, Pinecone, PyTorch, TensorFlow

EXTRACURRICULAR

Amazon Web Services 

Nov 2025 – Nov 2027

Cloud Club Captain

Bengaluru

- Managed and mentored a student community as AWS Cloud Club Captain, driving cloud learning initiatives and hands-on workshops.

Kaggle 

Dec 2024 – Present

Contributor

India

- Contributed datasets, notebooks, and ML solutions on Kaggle, focusing on experimentation and model improvement.

CERTIFICATIONS

- Cloud Infrastructure 2025 Certified Data Science Professional
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- Data Scientist Associate - Datacamp
- SAP Certified - Data Analyst
